ROAD IMPROVEMENTS ... You may have noticed a lot of road construction on US-23 for the last couple of weeks. According to M-DOT, the work will continue for at least the next month. Presently, they are doing curb installs and replacement and drain installs and repairing two bridges between Foster Rd and Iosco County line. I was able to work it out that they will pave an approach at Cemetery Beach, so it should extend at least 10 feet toward the lake, which is the width of the highway right-of-way and “maybe a little more” so says my anonymous source. According to M-DOT, actual surface grinding and paving from Foster Rd to the Iosco line will not begin until after Memorial Day weekend.

RV PARK SEWER LINE ... I was notified by Bob Wiltse that he has obtained permits from the Arenac County Health Department and the Arenac County Road Commission plus Mis Digg, to bore under Michigan Ave and Stanley Blvd area to install a 2” sewage line from his Charity Island RV Park, located behind Northport Marina and terminating at the Northport Wastewater treatment pond adjacent to the boat repair sales and service facilities. The distance from his park to the pond is about 400 yards, maybe more, and is quite an ambitious project. This project has met with some challenges over the last 4 years, and we wish him the best with having it completed with the next couple of weeks, as we are looking forward to the ribbon cutting and “obligatory” party!
